

Effect of the requirement of family
labour on age of marriage

Dataset

UDAYA by Population Council

“This program established levels, patterns, and trends surrounding the quality of transitions to young adulthood among both younger adolescents aged 10-14 and older adolescents aged 15-19 throughout the states of Bihar and Uttar Pradesh.”

Conducted in two phases - 2015-16 and 2018-19

Contains information on - Education, Vocational skills, Work/Access to livelihood, Migration, Aspirations, Communication, Mobility, Decision Making, Sexual and Reproductive matters, Health, Substance Abuse and Violence, Media Exposure

Need for Study?

Dearth

Of

Literature, *Simply*.

Most studies look at age of marriage as X

2 studies looked it as a Y, before 2010

focussing on individual, family and cultural factors

Work_index

Varies from 0 to 4.

0 means least dependence to 4 at highest dependence

Every yes questions below counts as a single point.

☒ Name	Label	Type
☒ gg151a	participation in housework	byte
☒ gg151b	taking care of siblings	byte
☒ gg151c	shopping for household provisions/paying bills	byte
☒ gg151d	fetch water/firewood for household	byte
